

Amanecer Case Study: Increased Funding Using Data for Grant Writing

At a Glance

Challenges

- Needed to easily pull and track data for accurate grant applications and continued funding

How Exym Helped

- Exym's EHR software made it easy to quickly pull data, like demographics and outcomes, so that Amanecer could find and apply to grants for which they were best suited

“

Exym has made pulling pertinent data that funders ask for easier!

Grant Writer

Amanecer Community Counseling Service

Objectives

Amanecer Community Counseling Service was created in 1975 by Dr. Cecil Hoffman with the belief that the life-restoring benefits of counseling should be available to all who need them. Today Amanecer serves almost 2,000 individuals annually.

As the program has grown, so has their need for funding, so they can continue to provide services to the most vulnerable populations. Mental health grants and funding opportunities are available, but Amanecer needed to be able to easily track program outcomes, pull relevant demographics, and provide the data that grant funders asked for in their applications. Amanecer need an EHR software solution to help them navigate this process.

Solutions

Exym's EHR software had the features Amanecer needed to track pertinent grant application information, apply for new grants, and maintain their existing grant funding.

How They Did It

Amanecer uses data, like client demographics, languages spoken, trauma history, client age, and client diagnoses to decide if they meet specific grant criteria. Having this data at their fingertips makes it easier to find grants that fit the populations they serve.

It also helps them easily supply information in their grant applications and demonstrate their organization's needs and how they meet specific grant criteria.

Outcomes are measured through ongoing reporting:

Program outcomes are conveyed to funders using reports and data found within Exym. With this data, they are able to share successes within the grant program, and give a detailed accounting of how the money was spent and the benefits to clients.
